## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. Receipt is acknowledged of an Information Disclosure Statement, filed 23 December 2004, which has been placed of record in the file. An initialed, signed and dated copy of the PTO-1449 form is attached to this Office action.

### ***Allowable Subject Matter***

2. Claims 1 and 3-9 are allowed.

### ***Election/Restrictions***

3. Newly submitted claims 10-21 are directed to inventions that are independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1 and 3-9, drawn to a broadly claimed flap making station and a form-fill-seal machine including said broadly claimed flap making station, classified in class 53, subclass 553.
- II. Claims 10-20, drawn to at least two opposing continuous film supplies; an aperture means creating station; and a specifically claimed flap making station (35 USC 112, 6<sup>th</sup> paragraph is considered to be invoke by applicant because of the recitation "means for folding...") in a form-fill-seal machine, classified in class 53, subclass 553.
- III. Claim 21, drawn to a support and braking means, a bulge forming station, and heating and sealing and filling station, in a form-fill-seal machine, classified in class 53, subclass 553.

Art Unit: 3721

- a.** The inventions are distinct, each from the other because of the following reasons:

  - i.** Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for making a flap on a bag; invention II has separate utility such as for making a flap on a pouch; and invention III has separate utility such as for making a pouch without a flap being formed. See MPEP § 806.05(d).
- b.** Because these inventions are distinct for the reasons given above and the search required for any one of Groups I-III is not required for the other Groups I-III, restriction for examination purposes as indicated is proper.
- c.** Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4.** Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 10-21 stand withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Art Unit: 3721

5. This application is in condition for allowance except for the presence of claims 10-21 directed to inventions non-elected with traverse in the telephone call of 3 September 2005.

**Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.**

**The prosecution of this case is closed except for consideration of the above matter.**

#### ***Conclusion***

6. This application is in condition for allowance except for the following formal matters:

The abstract of the disclosure is objected to because the word "create" should be changed to --creating-- (line 3) and because of the use of legal phraseology (line 5). Correction is required. See MPEP § 608.01(b).

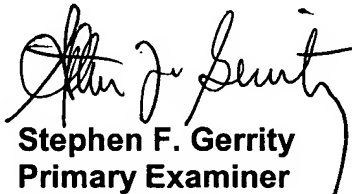

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
